Thank you very much for choosing us as your trusted SSL shop

SSL Activation Guide

1. Please contact your hosting provider to request

   - *Webserver type* SSL is supposed to be installed at

   - *CSR code* (Certificate Signing Request) required for SSL activation

   It is strongly recommended that the **RSA (Private Key)** *generated along with the CSR is* **provided to you by the web-host**, *backed up and stored safely.*

2. Once you get the webserver type and CSR code

   - Go to â€œ MySSLs â€ section of your account at SSLs.com

   - Select a corresponding certificate and hit â€œActivateâ€

   - Follow the instructions
